

# Dust Collector Filters

Designed to Perform . . . Built to Last!

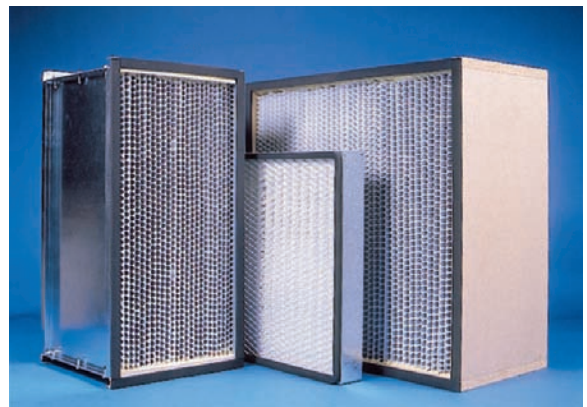

## Efficient, Cost Effective Option for OEM Replacement Filters!

APEL is an industry leader in the design & manufacture of replacement filter elements for baghouses, dust collectors and dry process equipment. We offer you quality crafted filters for **all brands of OEM equipment**, manufactured from our broad range of filter medias and components. With APEL's top-rate customer service and expert technical support, we'll carefully assess your filtration needs and construct a standard or custom filter for you. The results of our labor will be reflected in the **efficient performance** of your operating systems with **high efficiencies** and **minimum down time**.

### TYPICAL APPLICATIONS

- |                   |                          |
|-------------------|--------------------------|
| Welding Fume      | Woodworking              |
| Bin Vent          | Laser Cutting            |
| Metal Grinding    | Mixing Equipment         |
| Co-generation     | Cement                   |
| Powder Coating    | Pneumatic Conveying      |
| Pharmaceutical    | Industrial Vacuum        |
| Foundries         | Blasting                 |
| Mining            | Food Processing          |
| Pollution Control | <i>...and much more!</i> |

DIRECT REPLACEMENTS FOR:	
» Donaldson®	» Nordson®
» Farr®	» Sly®
» Flex-Keen®	» TDC®
» Gore®	» Torit®
» MAC®	» Wheelabrator®
» MPF®	<i>...and others!</i>
